

Writing a Process Paragraph [GRADED]

Part A: Brainstorming using AI

Part B: Writing the paragraph

Part C: Peer Review and Feedback

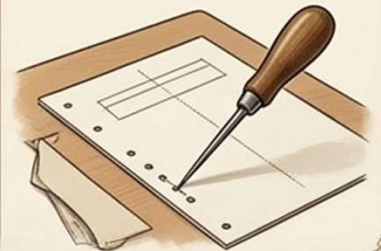

Part A:

- Using any Gen AI, brainstorm a topic for a process paragraph.
- Based on this topic, generate a process image listing all the steps to follow.

1. SIGNATURE PREP:
Folding & Pressing

2. PUNCHING HOLES:
Marking & Awl Work

6. COVERING & FINISHING:
Applying Cover & Final Details

**3. SEWING THE
TEXT BLOCK**
(Hand-Stitching to Cords)

5. BOARD ATTACHMENT:
Preparing & Affixing Boards

5. BOARD ATTACHMENT:
Preparing & Affixing Boards

4. SPINE FORMING:
Gluing, Rounding & Backing

Part B: Write the Process Paragraph

The art of traditional bookbinding is a multi-stage craft. The process begins with Signature Prep, where large sheets of paper are precisely folded and pressed into grouped sections called signatures. Once prepped, the binder moves to Punching Holes, using a marking guide and an awl to create the pathways for the thread. The heart of the structural work occurs during the Sewing of the Text Block, where these signatures are hand-stitched onto vertical cords or tapes for stability. Following the sewing, the Spine is formed through a combination of gluing, rounding, and backing to give the book its characteristic shape and flexible hinge. The final structural phase involves Board Attachment, where rigid covers are securely affixed to the sewn cords. Finally, the book undergoes Covering and Finishing, where leather or decorative cloth is applied, and final details, like gold tooling or titling, are added to complete the masterpiece.

Part C: Peer Review

- Students will exchange their essays with each other and record a 1–2-minute feedback presentation/ video.
 - Give a 1-2 minutes feedback presentation in the class.
-

—
The **final deliverables** for this task would be:

1. The AI-generated process image
2. The complete Process Paragraph
3. Feedback video/ presentation
