4

SDG Link

SDG 3 — Good health and well-being; SDG 5 — Gender Equality

Gender Equality Interviews: Method & Participants

- **Objective:** Understand societal views on gender roles
- **Method:** Physical interviews (in-person)
- **Participants:** 8 people; 4 girls, 4 boys
- **Locations:** University students and general public

📄 Keep interviews respectful and open ended to capture authentic perspectives.

Key Findings

Positive Views

Several girls expressed balanced, pro-equality positions and supported equal opportunities.

Support for Equality

Some participants across genders—advocated equal access to education and jobs.

Misconceptions

One male participant held restrictive views about women's roles in employment a target for dialogue.

Reflection & Actions Taken

Reflection

Society shows both awareness and lingering misconceptions; dialogue and education are essential.

Learning

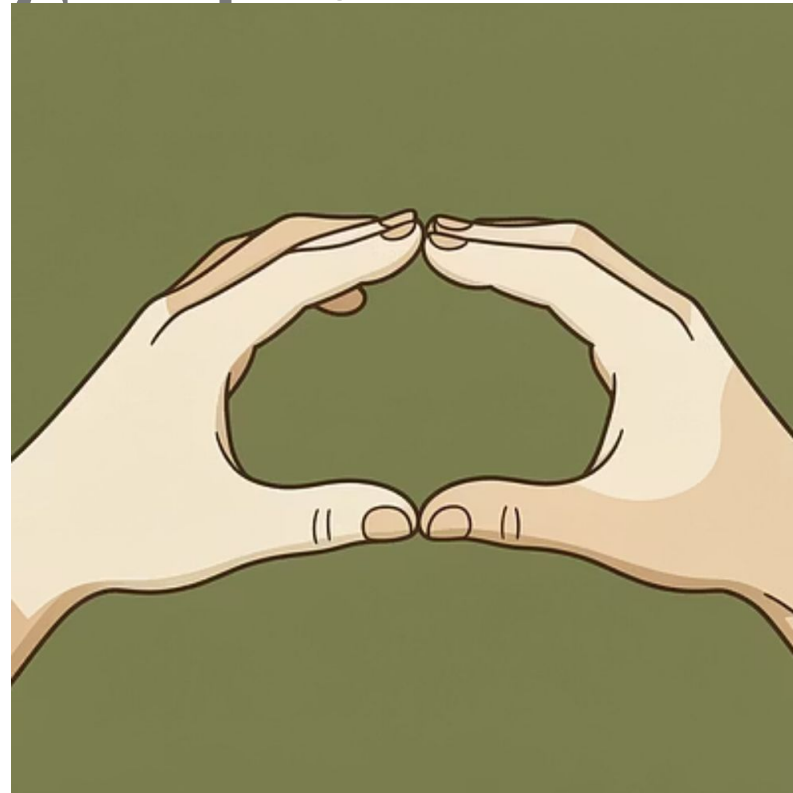

Equality is accepted by many but misunderstood by some targeted conversation helps bridge gaps.

Actions

- Engaged respectful conversations to challenge misconceptions
- Encouraged balanced thinking and critical questions
- Produced a short interview video to share in class
- Used video as awareness material

Impact &

Impact

Encouraged critical thinking • Raised awareness about stereotypes • Strengthened communication and confidence

SDG Connection

SDG 5 — Gender equality: Small conversations spark behavioural change.

“Change begins with awareness and awareness begins with conversation.”
