Communication Styles that Don't Communicate

[1] Studies show that certain styles of interpersonal communication are less effective than others. [2] Which styles are the ones to avoid? [3] These same studies indicate that the two least effective styles are aggressive and passive communication. [4] On the one hand, an aggressive style involves speaking in a disrespectful manner, expressing anger, or trying to dominate the conversation. [5] For example, a business executive might tell his coworker that his ideas for a new product are terrible. [6] Then he might interrupt him when he tries to explain his ideas. [7] This approach hinders successful communication. [8] It also creates barriers between people. [9] Passive communication style, on the other hand, can be equally unproductive. [10] A passive style might lead a person to hide his or her beliefs, speak quietly, and submit to all demands. [11] Someone working on a fashion design project, for instance, might agree that to use fabric that she thinks is unattractive. [12] He would not express his true feelings to the group. [13] In short, ineffective communicators can fail to influence others either by being too forceful or by hiding their opinions.

Anyone who has been in the hospital with a serious illness can tell you that the sight of a good nurse is the most beautiful sight in the world. Today, the hospital nurse has one of the hardest jobs of all. Although a doctor may direct the care and treatment of a patient, it is the nurse who must see to it that the care and treatment are carried out. A nurse must pay attention to everything, from the condition of the hospital bed to the scheduling of medication throughout the day and night. In addition to following a doctor's orders for the day, the nurse must respond to whatever the patient might need at any given moment. A sudden emergency requires the nurse to make an immediate judgment: can the situation be handled with or without the doctor being called in? More recently, nurses have become increasingly burdened by paperwork and other administrative duties. Many people worry that the increasing demands on nurses will take them away from what they do best—namely, taking care of people on a one-to-one basis.

This was one of the worst situations I had ever been in. There was a tube in my nose that went all the way to the pit of my stomach. I was being fed intravenously, and there was a drain in my side. Everybody came to visit me, mainly out of curiosity. The girls were all anxious to know where I had gotten shot. They had heard all kinds of tales about where the bullet struck. The bolder ones wouldn't even bother to ask: they just snatched the cover off me and looked for themselves. In a few days, the word got around that I was in one piece.

Last evening at a party, a complete stranger asked me, “Are you a Libra?” Astrology is enjoying increasing popularity all across the United States. My wife hurries every morning to read her horoscope in the paper. At the local stores, cards, books, T-shirts, and other useless astrological products bring fat profits to those who have manufactured them. Even some public officials, like the British royal family, are known to consider the “science” of astrology before scheduling an important event.

Placement of Topic Sentences

Topic Sentence First

Synonyms, words that have the same basic meaning, do not always have the same emotional meaning. For example, the word stingy and frugal both mean 'careful with money'. However, calling someone stingy is an insult, but calling someone frugal is a compliment. Similarly, a person wants to be slender but not skinny, aggressive but not pushy. Therefore, you should be careful in choosing words because many so-called synonyms are really not synonyms at all.

Topic Sentence Last

Art can inform , embellish, inspire, arouse, awaken, and delight us. Art can challenge us to think and see in new ways and help each of us to develop a personal sense pf beauty and truth. It can also deceive, humiliate and anger us. A given work of art may serve several functions all at once.

Topic Sentence in the Middle

If a person won a lottery or invested in right stocks, his or her social class could change in an upward direction in an instant. Likewise, the mortgage crisis and corporate downsizing have sent many middle-class families plummeting into poverty. Social mobility is a term that describes social class change, either upward or downward. Wherever we are in life, then, there's always the chance that something could happen to us that would change our status. If social class is a ladder, social mobility occurs when we are moved upward or downward.

for the Paragraphs**

I would probably have lived my entire existence within a one-mile radius of where I was born. I would undoubtedly have married a woman of my identical religious, socioeconomic, and cultural background. I would almost certainly have become a medical doctor, an engineer, or a software programmer. I would have socialized within my ethnic community and had cordial relations, but few friends, outside that group. I would have a whole set of opinions that could be predicted in advance; indeed, they would not be very different from what my father believed, or his father before him.

- a. If I had remained in India, my destiny would to a large degree have been predictable.
- b. If I had remained in India, I would have been very happy living in the neighborhood where I grew up.
- c. If I had remained in India, I would have married someone very like my own mother.
- d. If I had remained in India, I would have had an excellent education.

It is not that poor people in the Third World don't work hard. On the contrary, they labor incessantly and endure hardships that are almost unimaginable to people in the West. In the villages of Asia and Africa, for example, a common sight is a farmer beating a pickax into the ground, women wobbling under heavy loads, children carrying stones. These people are performing very hard labor, but they are getting nowhere. The best they can hope for is to survive for another day. Their clothes are tattered, their teeth are rotted, and disease and death constantly loom over their horizon.

- a. Poor people from the Third World live in small villages in Asia and Africa.
- b. The lives of many poor people in the Third World are defined by an ongoing struggle to exist.
- c. Disease is a constant threat to poor people in the Third World.
- d. Poor people in the Third World work constantly.

Can I prove my point?

Doctors are terrible. They cause more problems than they solve. I don't believe most of their treatments are necessary. History is full of the mistakes doctors have made. We don't need all those operations. We should never ingest all those drugs doctors prescribe. We shouldn't allow them to give us all those unnecessary tests. I've heard plenty of stories that prove my point. Doctors' ideas can kill you.
